LinkedIn : Pramudia Ramadhan

Education

Dian Nuswantoro University

Bachelor of Computer Science. GPA : 3.74

Relevant Coursework: Data Science, Data Analyst, Web Developer, IT Support

Semarang, Indonesia

Sept 2022 – June 2026 (Expected)

Experience

PT Vinix Seven Aurum

Data Analyst Intern

Remote

Feb 2026 – Present

- Market Research & Data Integration: Conducted secondary market research, designed customer survey strategies, and performed data cleaning and integration to generate business-driven analytical insights.
- Statistical Analysis & Predictive Modeling: Performed hypothesis testing and linear regression in Python to evaluate marketing campaign effectiveness and forecast traffic growth based on advertising spend.
- Healthcare Analytics & Looker Studio Dashboarding: Built interactive Looker Studio dashboards to analyze patient demographic and operational data, identify wait time bottlenecks, and deliver actionable recommendations for hospital management.
- Tableau Dashboard & HR Attrition Analytics: Developed an interactive Tableau dashboard featuring KPI cards, filters, and attrition analysis to identify high-risk employee segments by department, job title, and satisfaction score for HR decision-making.

Lembaga Pendidikan Islam Hidayatullah

IT Support Intern

Semarang, Indonesia

July 2025 – Oct 2025

- IT Infrastructure & Network Maintenance: Managed IT hardware repairs and network cabling installations while optimizing CCTV system connectivity and cable management.
- Frontend Development: Designed and developed a web-based employee attendance interface to streamline internal check-in and data tracking processes.

Projects

- Text-based Stress Detection: Fine-tuned DeBERTa-v3 using Python to classify stress vs non-stress text, achieving 83% accuracy and 84% F1-score on the Dreddit dataset.
- TikTok Sentiment Clustering: Compared DBSCAN, K-Means, and Fuzzy C-Means using Python to cluster sentiment data, with DBSCAN achieving the best performance (Silhouette Score: 0.88).
- Bound By Fate: Collaborated in a team to develop a 2D top-down RPG game using Unity, responsible for designing character assets and implementing movement and skill mechanics across 3 playable levels.
- AR Mobile App: Collaborated in a team to develop an AR-based mobile application using Unity, enabling users to visualize 3D watch models through marker-based tracking with multiple design and strap options.

Skills & Interests

Technical: Data Analysis, Data Science, Python, NLP, Excel, Web Development, Looker Studio

Language: Indonesian (Native), English (Intermediate)

Interests: Technology, Hiking, Gaming, Traveling, AI Development
